

Overview

For thirty years, the NC GIS Conference has brought together professionals from across the state to share in their experiences and learn about current trends and technologies affecting the GIS community. The 2017 event represents the 30th anniversary of the conference and a special recognition will be part of the conference program. NCGIS2017 includes over 45 technical and educational sessions, 4 full-day workshops sponsored by the Carolina Urban and Regional Information Systems Association (CURISA), and over 40 vendor exhibits. With a fee of only \$175 (\$225 after Jan. 24), the conference offers a tremendous value. More info at <http://ncgisconference.com> or on Twitter @ncgisconference.
